

2024 YEAR IN REVIEW

A YEAR OF INNOVATION

NEW

Products

VN1000 Series VibeNavigator™ Data Collection Extension Pole

Product Highlights:

- Easily and safely collect data from hard-to-reach places
- Integrated breakaway safety feature connector and internally-routed cable for enhanced analyst safety
- Completely customizable mating safety feature for compatibility with your data collector
- Available in 3 lengths: 2 - 4 ft (0.6 - 1.2 m), 4 - 8 ft (1.2 - 2.4 m), 6 - 12 ft (1.8 - 3.7 m)
- Flexible mounting pivot point – sensor can rotate up to 80°

VN1000 Series VibeNavigator™ Data Collection Extension Pole

Available Options (click on a product to view on our website):

VN1000-XA
for CTC standard size, top
exit,
single-axis
accelerometers

VN1000-XB
for CTC TCEB330
Series circular triaxial
sensors

VN1000-XC
for Emerson/CSI A0643TX
triaxial
sensors

MA Series High Voltage Isolated Accelerometers

Product Highlights:

- 10 kV DC (7 kV AC) electrical isolation between the base and internal electronics
- Molded polycarbonate case with fully encapsulated sealing and stainless steel base and connector
- Designed for use with CTC grounded connectors for added noise protection (A2AG and A2NG)
- Two pin, top exit connector
- 2.22 in. (56.3 mm) overall height
- 58 to 250 °F (-50 to 121 °C) temperature range

MA Series High Voltage Isolated Accelerometers

Available Options (click on a product to view on our website):

MA102-1A
100 mV/g, $\pm 10\%$

MA133-1A
500 mV/g, $\pm 10\%$

MA150-1A
100 mV/g, $\pm 15\%$

MA153-1A
500 mV/g, $\pm 15\%$

MA202-1A
100 mV/g, $\pm 5\%$

MA233-1A
500 mV/g, $\pm 5\%$

HVLP Series

High Voltage Isolated Loop Power Sensors

Product Highlights:

- 10 kV DC (7 kV AC) electrical isolation between the base and internal electronics
- Molded polycarbonate case with fully encapsulated sealing and stainless steel base and connector
- Designed for use with CTC grounded connectors for added noise protection (A2AG and A2NG)
- Two pin, top exit connector
- 2.22 in. (56.3 mm) overall height
- 4 to 212 °F (-20 to 10 °C) temperature range

HVLP Series

High Voltage Isolated Loop Power Sensors

Available Options (click on a product to view on our website):

HVLP202
4-20 mA output
proportional to vibration in
velocity

HVLP302
4-20 mA output
proportional to vibration in
acceleration

Optional Stack Lights For Relay & Display Enclosures

Product Highlights:

- Protect critical machinery and processes from excessive vibration and catastrophic failure
- Capability to trigger alarms based on the amplitude of the overall vibration within a selected frequency range
- Stack light available in single-color (red) or tricolor options with optional horn alarm
- Stack light can be programmed to flash or remain steadily on when in alert

Optional Stack Lights For Relay & Display Enclosures

Available Options (click on a product to view on our website):

PMX Series
for 1- 4 Loop Power Sensors

PXD100 Series
for 1- 4 PRO Line
Proximity Probes

SCD100 Series
for 1- 4 CTC SC Series
Signal Conditioners

M12 Connector Options For Low Frequency 500 mV/g Sensors

Product Highlights:

- Popular 4 pin, M12 connector

- Standard size top and side exit orientations

- Welded, hermetic sealing

- 58 to 250 °F (-50 to 121 °C)
temperature range

- Designed for low-speed rotors,
main bearings, and gear box inputs,
as well as high frequency detection

Available Options (click a product to view on our website):

AC133-M12A
500 mV/g, ±10%

AC134-M12A
500 mV/g, ±10%

AC233-M12A
500 mV/g, ±5%

AC234-M12A
500 mV/g, ±5%

C644

Data Collector Connector

*Click on the product
to view on our website*

Product Highlights:

- For use with the popular Pruftechnik VIBXPART 3 Data Collector
- 3 pin connector
- Durable polyurethane strain relief
- IP66 rated
- Single-axis compatible
- Our previously existing C619 connector is the triaxial compatible version for the VIBXPART 3

MH107-3A

Quick Disconnect Receptacle

*Click on the product
to view on our website*

Product Highlights:

- 1/4-28 adjustable orientation integral stud mounting bolt
- Designed for use with triaxial wireless sensors
- Easily control orientation of axes
- 316L stainless steel
- 90-degree engagement with quick disconnect stud for accurate, repeatable readings

Storage Cases For TMP Line Sensors

*Click on the product
to view on our website*

Product Highlights:

- Protect your TMP sensor investments with our complimentary storage case
- Molded from conductive polypropylene material (ESD-safe) which makes these cases perfect for storing static-sensitive components
- Custom-cut foam insert holds your sensor securely in place to prevent damage during storage
- Interior case dimensions: 3 x 3 x 1.25 in. (7.6 x 7.6 x 3.2 cm)
- Included with all TMP sensors

WS100

ConnectSens™ Wireless Sensor

Product Highlights:

- Triaxial process control sensor with temperature output
- Overall vibration amplitude data in RMS, Peak, or PK-PK
- Factory configurable reading intervals in hours (from 1 – 24)
- Industry-leading 2,1000 ft. (640 m) line-of-sight range
- User-replaceable battery with up to 4 years battery life
- With frequency bands available from 2 Hz to 5 kHz

WS200

ConnectSens™ Wireless Sensor

Product Highlights:

- Single-axis dynamic vibration signal capture sensor with temperature output
- Time waveform and FFT data
- User-configurable reading interval configurable in hours from 1 - 24
- Industry-leading 1,200 ft. (366 m) line-of-sight range
- User-replaceable battery with up to 4 years battery life
- Frequency Range: 0.5 Hz to 10 kHz

WS300

ConnectSens™ Wireless Sensor

Product Highlights:

- Triaxial dynamic vibration signal capture sensor with temperature output
- Time waveform and FFT data
- User-configurable reading interval configurable in hours from 1 - 24
- Industry-leading 1,200 ft. (366 m) line-of-sight range
- User-replaceable battery with up to 4 years battery life
- Frequency Range: 0.5 Hz to 10 kHz

ACCESS360 ConnectBridge™ Wireless Gateway

Product Highlights:

- Used to connect CTC Connect-compatible products to a TCP/IP network
- Onboard storage with expansion available through micro SD slot
- Unlimited sensor inputs - mix and match ConnectSens™ WS100, WS200 and WS300 sensors in any quantity
- Comes preloaded with free ConnectView™ web App which provides basic vibration monitoring management tools and device management options and is designed for integration into 3rd party systems

ConnectView™ Web App

Product Highlights:

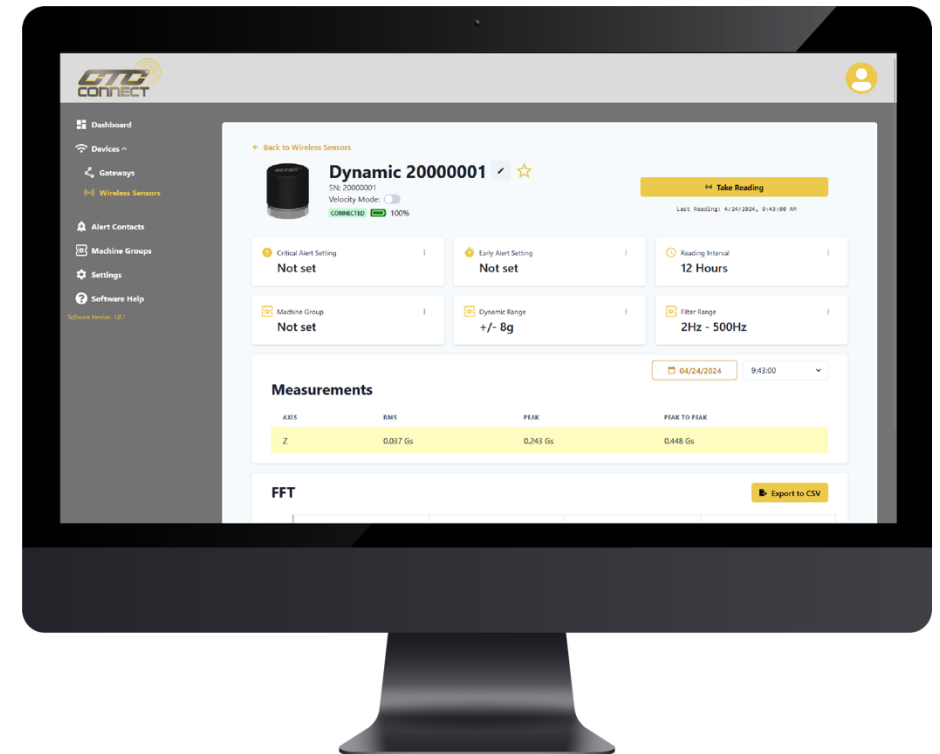

ConnectView™ basic vibration tools and device management web app comes preinstalled on ACCESS360 ConnectBridge™ Wireless Gateway

Own your data - no hidden recurring charges

Configure WS200 & WS300 Sensors (WS100 sensors are factory configurable only), nickname sensors, create machine groups, view sensor battery life, view basic vibration data, and more

Access the ConnectView™ Wireless Web App on any PC, laptop, tablet, or smartphone connected to the same network as your other Connect Line Products, or remotely via your cloud

Designed to be used in conjunction with 3rd party vibration analysis software and is not intended for in-depth analysis

DISPKIT-CONNECT

Connect Wireless Display Kit

Product Highlights:

Includes our most popular, fully-functional Connect Line wireless hardware:

- WS100 Series Sensor
- WS300 Series Sensor
- MH214-3A Mounting Magnet
- MH107-3A Quick Disconnect Receptacle
- ACCESS360 Gateway
- WS-PoE Power over Ethernet Injector

Comes packaged in a heavy-duty, foam-lined plastic case is waterproof and TSA-approved

Exterior Dimensions: 16.30 in (414 mm) L x 13.58 in (345 mm) W x 5.08 in (129 mm) D

Bently Nevada Orbit DCM Compatible Short Form Catalog

A complete guide to our wide range of instrumentation compatible with Bently Nevada Distributed Condition Monitoring (DCM) for use in standard Class 1, Division 2 / Zone 2 environments, including:

- Enclosures
- Proximity Probes
- IEPE Standard Accelerometers
- IEPE Triaxial Accelerometers
- Temperature Sensors

**BENTLY NEVADA
ORBIT DCM COMPATIBLE
VIBRATION ANALYSIS HARDWARE**

CTC is proud to manufacture a wide range of instrumentation compatible with Bently Nevada Orbit Distributed Condition Monitoring (DCM) for use in standard Class 1, Division 2 / Zone 2 environments.

WHY CHOOSE CTC PRODUCTS?

**FLEXIBILITY**
Save money by ordering exactly what you need:
No Minimum Order Quantities on any CTC product.
Customizable Cable Lengths create any cable and connector assembly at your preferred length using CTC's proprietary online Custom Cable Wizard application.

**SPEED**
Did you know CTC has the industry's fastest 10-day standard lead times? Get your products shipped sooner so you never have to plan your maintenance schedule around a lengthy delivery window.

**DURABILITY**
Our products are built with strength to endure the harshest industrial environments, and we stand behind the quality of our products with the industry's best warranties.

**UNMATCHED CUSTOMER SERVICE**
Get help and answers quickly from our knowledgeable, US-based customer service team - we always answer phone calls and respond to emails promptly.

Power Pack Guides

 **Coal Pulverizers**
Power Pack

CTC makes it easy to create an effective condition monitoring system for coal pulverizers using the industry's most trusted accelerometers, cables, connectors, and junction boxes.

Pulverizer Gear Drive Assembly

Recommended System

- 

AC192-3D/030*/031-L and AC194-3D/030*/031-L
Compact size, top and side exit accelerometers with armored integral cable, with L termination to connect to iBox, 100 mV/g, $\pm 10\%$
*30 ft (9.1 m) is average length of integral cable; your actual required length may vary
- 

JB110-12C
iBox single-axis vibration switch box, fiberglass enclosure, NEMA 4X (IP66) rated, with 12 single-output sensor inputs
- 

Fully Customizable Data Collector Cordsets
Access data from JB110 via a BNC Jack or 2 pin-MIL connector on the front of the enclosure using a cordset customized with CTC's Cable Wizard. Configure your cordset with a connector compatible with the most popular data collector brands including Acoem, Betavib, Emerson, Bently Nevada, Pruftechnik, and many more, and terminated with an 'F' (BNC plug) or K2C (2 socket MIL-style connector) to connect to your iBox.

[TurboDefense™ Turbine Monitoring Solution](#)

[VibeDefense™ Automated Vibration Monitoring Solution](#)

TurboDefense™ Turbine Monitoring Kit

CTC introduces its innovative TurboDefense™ Turbine Monitoring Solution which integrates the advanced features of the PXD Series Proximity Probe Driver Relay & Display Enclosure with a newly-added stack light feature. This comprehensive solution harnesses the power of CTC's PRO Line Proximity Probe Systems and converts the data into a 4-20 mA output signal that can be displayed and alarmed for automated journal bearing monitoring. In the world of turbo machine monitoring, most automated solutions require extremely expensive machine monitoring systems. Our TurboDefense™ breaks barriers as an easy, cost-effective solution for enhancing equipment reliability by alerting you before it's too late.

Kit Components

- 

PXD Series Proximity Probe Driver Enclosure with Stack Light
Factory configurable for 1 to 4 Proximity Probe Drivers. Options for red light or tricolor stack light.
- 

PRO Proximity Probe Drivers
Select from our best-in-class drivers:
First, select your compatible system -
5 mm FFV, 8 mm, or 11 mm proximity probe compatible drivers.
Then select your desired driver type -
4-20 mA overall, 4-20 mA axial, or 4-20 mA radial.
- 

PRO Proximity Probe (with Optional Extension Cables)
Select from the industry's most durable proximity probe offerings for
5 mm FFV, 8 mm, and 11 mm proximity probes with a wide variety of system
lengths with optional armor jacketing.
- 

PRO Proximity Probe Mounting Hardware
Select from a wide variety of mounting accessories including mounting
blocks, mounting bushings, and reverse mount housings.
